

Exhibition Design

THE FREDERIC WHITAKER AND EILEEN MONAGHAN WHITAKER FOUNDATION

This retrospective exhibition reflects the watercolor careers of Frederic Whitaker and Eileen Monaghan Whitaker and revolves around 40 paintings by each artist in a design that is highly accessible and informative as well as inspiring. It celebrates the evolution of their work throughout the decades from the 1930s through the 90s. It also illustrates the ways in which the artists were influenced by one another and the times in which they lived. The historical photographs and narrative give insight into their personal and professional lives together in New York, New England and California.

The design, layout and text are established and can be adapted to space requirements.
